ABOUT ME

I am an ambitious Information Systems student who enjoys turning ideas into practical solutions. My focus is on web development, system analysis, and UI/UX design. I am eager to contribute to innovative projects and develop practical solutions.

PROJECTS

Library Management System (5/2024)

- Developed system using C# and Windows Forms for a desktop application.
- Designed the user interface with interactive forms to enhance user experience.
- Implemented back-end logic for managing book checkouts, returns, and inventory tracking.

Club Management System (5/2025)

- Developed a web-based system using Oracle APEX to support and automate club operations.
- Designed and implemented features to organize data, track activities, and improve workflow efficiency while enhancing the overall user experience.

Hotel Booking Website (8/2024)

- Hotel booking website using PHP, HTML, and MySQL for dynamic content management.
- Implemented MySQL database integration to store and manage customer bookings and hotel information.

Prince Burger App(8/2024)

- Designed the user interface and user experience for the Prince Burger app using Figma to create an intuitive and visually appealing layout.
- Focused on enhancing the app's usability with a seamless design to improve the overall customer ordering experience.

Odoo ERP system (12/2025)

- Implemented and configured an ERP system using Odoo to manage core business functions including CRM, Sales, Accounting, and HR for an educational center.
- Enhanced operational efficiency by automating workflows such as student management, invoicing, employee records, and performance tracking.
